

## **FIB BEER SYSTEMS TAKES A NEW STEP BY MOVING TO HEERENVEEN**

*Leeuwarden, June 29, 2023 - FIB Beer Systems is proud to announce that the company is moving to a new location at the Heerenveen International Business Park on the Icarus. As of August, the company will move into this modern building. The decision to move is due to the strong and continued growth of the draught beer market and FIB Beer Systems' role in this growth.*

### **Proven track record and global installations**

The tank beer market has experienced significant growth in recent years and FIB Beer Systems has been instrumental in supplying high quality tank beer systems to meet this growing demand. This growth has meant that the company has outgrown its current location in Leeuwarden. Although it was home to FIB Beer Systems and sister company FIB Industries, the shared location no longer provided sufficient space to support growth.

In order to continue to meet the increasing market demand, FIB Beer Systems decided to move to its new location in Heerenveen. The new building on the Icarus provides room for expansion and growth in the coming years. Director Cor Ax emphasizes that FIB Beer Systems has enough space for at least the next ten years to achieve further growth and maintain its leading position in the market.

### **Achieving ESG goals**

In addition to growth opportunities, the new site also contributes to the company's sustainability goals. FIB Beer Systems is committed to reducing its environmental impact and contributing to a more sustainable future. The new facility will allow the company to reduce energy consumption and create a more pleasant working environment for its employees. This focus on environmental, social and governance (ESG) issues demonstrates FIB Beer Systems' commitment to corporate responsibility and creating a positive impact on society.

FIB Beer Systems is excited about the move to Heerenveen and believes this is the next step in its growth trajectory. The company remains committed to providing high quality tank beer systems and exceeding the expectations of its customers. With the new location and improved facilities, FIB Beer Systems is ready to continue its success story and further grow the tank beer market.

### **About FIB Beer Systems**

FIB Beer Systems is a company dedicated to the design, manufacture, installation and maintenance of tank beer systems. They offer customized solutions for the delivery of beer between breweries and pubs. FIB Beer Systems has a global presence and supplies tanks of 125 litres or more primarily to breweries, as well as catering and events.
